Preface

Bureau of Statistics Khyber Pakhtunkhwa has been annually releasing Development Statistics since 1980. The publication is based upon secondary data and contains latest and comprehensive statistics on a wide array of subjects with district-wise breakdown. Statistical Abstracts highlighting comparative picture of Khyber Pakhtunkhwa with Pakistan have been given in the outset of the publication, while glossary of the terms used in the report has been provided at the end.

In some cases, national level data with provincial breakdown have also been incorporated to enable data users to make comparative analysis of national, provincial and district level data.

Efforts have been made to expand the scope and coverage of statistics by incorporating new tables in the sectors such as health, energy, local government etc. Similarly, to capture the performance of Sports, Tourism, Archaeology, Culture and Youth Affairs, an exclusive sector has been added.

Bureau of Statistics is extremely thankful to the Provincial Line Departments, District Governments and other data generating organizations for their cooperation in supplying requisite data for this publication. The team efforts of the staff of Bureau of Statistics in producing this publication are highly appreciated.

It is hoped, that the publication will best serve the needs of policymakers, planners, academia, researchers and other data users in context of evidence-based planning, decision - making and quantitative analysis

For convenience and easy accessibility to larger users of the data, the publication has been made available on the official website of Bureau of Statistics www.kpbos.gov.pk. Suggestions for improving the coverage and format of the forthcoming publication would be welcomed.

(Khaliq-ur-Rehman)
Director

An Historical Analysis of Population Census Data

Introduction

Population has long been recognized as one of the most important factor in the economic and social development process. Population growth patterns are linked to nearly every matter confronting humanity including poverty, urban pollution, education, energy production, roads, food, water scarcity and human health.

Population Census

Since independence, Six Population Censuses have been conducted. First decennial Population Census of Pakistan was conducted during the period from 9th to 28th February 1951, the second from 12th to 31st, January 1961, the third from 16th to 30th September 1972, the fourth from 1st March to 15th March 1981 and the fifth from 2nd March to 18th March 1998.

The sixth Population Census was conducted in two phases: Phase-I from 15th March to 13th April 2017 and Phase-II from 25th April to 24th May 2017. The sixth decennial Population Census was preceded by a full-fledged Housing Census. The Census figures covered the Population residing in Pakistan on 15th March 2017 excluding the Afghan Refugees living in Camps.

The Khyber Pakhtunkhwa Population as per 2017 Pakistan Census Report is 30.51 million which constitutes 14.69% of the population of Pakistan. The Population of this Province has increased at an average Annual Growth Rate of 2.89% over and above the National Growth Rate of 2.40%.

At the time, Census 2017 was conducted; the Newly Merged Areas were not part of the Khyber Pakhtunkhwa and were known as Federally Administered Tribal Areas (FATA). It comprises of 7 Agencies (Newly Merged Districts now) and 6 Frontier Regions (Tribal sub-divisions). Total population of erstwhile FATA was 4,993 thousand which is 2.41% of the Pakistan Population and 14.08% of the combined Khyber Pakhtunkhwa. The Average Annual Growth Rate of the Newly Merged Areas has been recorded as 2.41%.

The Population, Inter-Censal increase and Annual Population Growth Rates since 1951 in the province are provided in the following table:

Khyber Pakhtunkhwa Population

Sr. No.	Year of Census	Population (In Million)*	Inter Censal Increase (%)	Annual Growth Rate- Inter Censal (%)
Khyber Pakhtunkhwa Excluding Merged Areas				
1	1951	4.57	-	-
2	1961	5.73	25.77	2.34
3	1972	8.39	46.37	3.32
4	1981	11.06	31.86	3.32
5	1998	17.74	60.34	2.82
6	2017	30.51	72.04	2.89
7	1951-2017	-	567.83	
8	2017(Including MAs)	35.53		

* = The figures in the table may not be exact due to rounding.

The sex ratio (males per one hundred females) in 1998 was 105, which is 103 in 2017 Census thus registering a decline. The population density has increased to 238 persons per Square Kilometre in 1998 Census as compare to 148 persons per Square Kilometre in 1981. Similarly, the population density increased to 409 persons per square Kilometre in 2017 Census. Population density including Merged Areas is 349 persons per square Kilometre in 2017 Census.

Provincial Comparison

The inter-provincial comparison from various dimensions and angles of population is given in the table below:

COMPARATIVE STATEMENT OF PROPORTIONS OF PROVINCES AND PAKISTAN OF POPULATION CENSUSES, 1961, 1972, 1981, 1998 and 2017

(000s)

Province/ Region	1961		1972		1981		1998		2017	
	Pop	Proportion of Provinces	Pop	Proportion of Provinces	Pop	Proportion of Provinces	Pop	Proportion of Provinces	Pop	Proportion of Provinces
Pakistan	42,880	100.00	65,309	100.00	84,253	100.00	132,352	100.00	207,685	100
Punjab	25,464	59.38	37,607	57.58	47,292	56.13	73,621	55.63	109,990	52.96
Sindh	8,367	19.51	14,156	21.68	19,029	22.59	30,440	23.00	47,855	23.04

Balochistan	1,353	3.16	2,429	3.72	4,332	5.14	6,566	4.96	12,335	5.94
FATA	1,847	4.31	2,491	3.81	2,199	2.61	3,176	2.40	4,993	2.40
ICT	118	0.28	238	0.36	340	0.40	805	0.61	2,003	0.96

Note: Totals may not tally due to independent rounding.

Source: Population Census Organization, Pakistan Bureau of Statistics

Analysing the data from proportion point of view a substantial increase has been witnessed in case of Khyber Pakhtunkhwa whose proportion has been increased from 13.4% in 1998 to 14.69% in 2017. A slight increase in case of Sindh, Balochistan, FATA and ICT can also be observed. Punjab province shows a decreasing trend in the proportion dropping down to 52.96% in 2017 as compared to 55.63% in 1998.

Population Projection

For Population Projection, the growth rates as given in the Pakistan Economic Survey (worked out by National Institute for Population Studies) were not applied to Projections for the District as the NIPS did not calculate it for districts, so the inter-censal growth rates (1998-2017) were applied to the district projections by using the following formula:

$$P_1 = P_0 (1 + r/100)^n \text{ where,}$$

P_0 = Population of base Census

P_1 = Population of latest Census

r = Growth rate

n = Time Interval (in years) between two Census

Dependency Ratio

The ratio of persons in the ages defined as dependent (under 15 & over 64 years) to those in the ages defined as economically active (15-64 Years) in the Population.

Prices

Explanatory Note on Prices Sector

Stable Prices is closely associated with better growth and development outcomes. Price stability not only reduce uncertainty but simultaneously it also provide positive impacts on social, economic and psychological sphere of all segments of the society especially the deprived ones. Price statistics with efficient scope and coverage can play a vital role in the wellbeing of consumers.

Bureau of Statistics collects prices of 46 food and non-food commodities on weekly basis on every Thursday from three Divisional Headquarters i.e. Peshawar, D.I. Khan and Abbottabad. The field staff of BOS collects retail prices as per list of commodities from shopkeepers through personal interview from three markets in the above cities. An average monthly price for each commodity is calculated accordingly.

This section contains the following important tables:

1. Index Numbers of Whole Sale Prices by commodity group of Pakistan
2. Combined Consumer Price Index Numbers by commodity group of Pakistan
3. Inflation rate in Pakistan Based on Consumer Price Index (CPI)
4. Average retail prices of essential food and non-food commodities in Abbottabad, D.I.Khan and Peshawar.

Transport & Communication

Transport & Communication

Transport & communication is a key socio-economic section which play an important role in the development process. The density of the road network is an indicative of economic development. Transport and communication has assumed more importance due to the changing environment in communication sector like cellular networks and internet etc.

Some economist has based their development models on development of transport and communication sector as the basic criteria to measure the development and growth of a country.

As far as our provincial, economy is concerned it depends on road much more as railways network in Khyber Pakhtunkhwa is very limited.

The transport and communication sector contains important statistics on the following area:

1. Roads
2. Transport
3. Railways
4. Post Offices
5. Telecommunication
6. Press

GLOSSARY

A

Afforestation

Afforestation is the artificial establishment of forests by planting or seeding in an area of non-forest land.

Arable Land

Arable land is land worked (ploughed or tilled) regularly, generally under a system of crop rotation.

Area not available for Cultivation

It means barren or mountainous land, area under roads, canals, rivers and all such areas, which are not utilized for agriculture purposes.

Artificial Insemination

The introduction of sperms into the female reproductive tract by other than natural means.

B

Basic Health Unit (BHU)

BHU is provided to serve about 5,000 to 10,000 populations and is responsible for comprehensive health care which, among other things, includes Midwifery, Child Care, Immunization, Diarrhea diseases, Malaria control, Child spacing, Mental and School Health Services within its areas.

C

Census

A Census is a survey conducted on the full set of observation objects belonging to a given population or universe.

Child Dependency Ratio (CDR)

CDR is the ratio of the number of children at an age when they are generally economically inactive (i.e. under 15), compared to the number of people of working age (i.e. 15-64 years old).

Consumer Price Index (CPI)

CPI as an important indicator of inflation measures the change over time in the prices of consumer goods and services acquired, used or paid for by households.

Cropping Intensity

Cropping Intensity is the ratio of cropped area over cultivated area multiplied by 100. It is the area sown during Kharif and Rabi seasons during a given year, out of the total cultivated area:

$$\text{Cropping Intensity} = \frac{\text{Cropped Area} \times 100}{\text{Cultivated Area}}$$

Cropping pattern

Cropping pattern is defined as the spatial representation of crops rotations, or as the list of crops that are being produced in an area and their sequence in time.

Crop yield

Crop yields mean harvested production per unit of harvested area for crop product.

Crude Birth Rate (CBR)

CBR is the ratio of the number of births during the year to the average population in that year; the value is expressed per 1 000 inhabitants.

Crude Death Rate (CDR)

CDR is defined as the ratio of the number of deaths during the year to the average population in that year; the value is expressed per 1000 inhabitants.

Crude Labour Force Participation Rate

The percentage of persons in Labour Force to the total Population.

Cultivated Area

It comprises that land which is sown at least during a year or the preceding year.

Culturable Waste

It comprises that uncultivated land, which is fit for cultivation but was not cropped during the year or in the preceding year.

Culturable Area

It is the composite of cultivated area and culturable waste.

Current Fallow

The cultivated area which is not cropped during the year, but was cropped during the preceding year.

D

Data analysis

Data analysis is the process of transforming raw data into usable information, often presented in the form of a published analytical article, in order to add value to the statistical output.

Dependency Ratio

The ratio of persons in the ages defined as dependent (under 15 and over 64 years) to those in the ages defined as economically active (15-64 Years) in the population.

Dispensary

A Health Institution having less than 10 beds.

Dropout Rate

Dropout rate is the proportion of the students dropped by gender/ level in reference year.

E**Enrolment Gender Parity Index (EGPI)**

The ratio of the female to male gross enrollment rate measures progress towards gender equity in gross enrollment rate at primary level. When the gender parity index shows a value equal to one, boys and girls enrollment are equal in terms of gross enrolment rates. A value less than one indicate that proportionately fewer girls than boys have enrollments.

F**Fertility Rate**

Average number of children that would be born to a woman during her lifetime if she were to pass through all her childbearing years (15-49) conforming to the age-specific fertility rates of a given year.

Food Security

When all people at all times have access to sufficient safe, nutritious food to maintain healthy and active life.

G**GDP**

The total market value of all final goods and services produced in a country in a given year.

GDP Deflator

The GDP deflator is a price index that measures inflation or deflation in an economy by calculating the ratio of nominal GDP to real GDP.

Gigawatt Hours

Abbreviated as GWh, is a unit of energy representing one billion (1 000 000 000) watt hours and is equivalent to one million kilowatt hours. Gigawatt hours are often used as a measure of the output of large electricity power stations.

H**Health Institution**

A health institution is defined as an institution, which provides health services, curative and preventive to all specific class of the public as outdoor/indoor, patients.

Hospital

A Health Institution having 10 or more than 10 beds. However, this definition will not be held where Government has differently named an Institution e.g. Rural Health Centre.

I**Infant Mortality Rate (IMR)**

IMR is defined as the ratio of the number of deaths of children under one year of age to the number of live births in the reference year; the value is expressed per 1000 live births.

K**Kharif Crops**

Kharif crops are sown in summer and harvested in late summer or early winter. The important Kharif crops are cotton, Rice, Sugarcane, Maize, Jowar and Bajra.

L**Labor Force**

It includes the population consisting of employed and unemployed.

Labor Force Participation Rate

It indicates the ratio of the labor force to non-institutional working age population.

Land Use

Land use refers to the socio-economic purpose of the land. Areas of land can be used for residential, industrial, agricultural, forestry, recreational, transport and other purposes.

Land Use Intensity

Land Use Intensity represents the cultivated area measured in terms of total culturable area multiplied by 100:

$$\text{Land Use Intensity} = \frac{\text{Cultivated area} \times 100}{\text{Total Culturable area}}$$

Literacy Rate

The literacy rate is the ability to read / write.

Literacy Rate (10 & Above)

Proportion of population aged 10 years and above who can read and write with understanding a simple sentence.

Live birth

A live birth is the birth of a child who showed any sign of life; the number of live births refers to the number of births excluding stillbirths.

M**Maternal Mortality Rate (MMR)**

MMR is the annual number of deaths of women from pregnancy related causes. When pregnant or within 42 days of termination of pregnancy, per 100,000 live Births.

O**Old-Age-Dependency Ratio**

Old-age-dependency ratio is the ratio of the number of elderly people at an age when they are generally economically inactive (i.e. aged 65 and over), compared to the number of people of working age (i.e. 15-64 years old).

P**Population Census**

A population census is a complete process of collection, reception, assessment, analysis, publication and distribution of demographic, economic and social data, which relate, at a given moment in time, to all the residents of a country.

Population Density

The population density is the number of population per unit of total land area measured in square kilometer.

Primary data

Data observed or collected directly from first-hand experience.

R**Rabi Crops**

Rabi crops are sown in the winter and harvested in late winter or during early summer. The important Rabi crops are wheat, grams, Barley, rapeseed and Mustard.

Refined Labour Force Participation Rate

The percentage of persons in Labour Force to the Population 10 years of age and above.

Rural Health Centre (RHC)

Under present concept, 4 Basic Health Units are linked to RHC. RHC provides medical cover to a population of 10,000 to 50,000. A Rural Health Centre may have up to 25 beds with Laboratory, X-Ray and Mino-surgery. It is linked through Tehsil/Taluka Hospitals to District Headquarter Hospitals, which have all Medical facilities.

S**Secondary data**

Statistical data taken from someone else findings.

Sex Ratio

Proportional distribution of the sexes in a population aggregate, expressed as number of males per 100 females.

Student Teacher Ratio

Student–Teacher Ratio is the number of students who attend a school or university divided by the number of teachers in an institution in reference year.

Sub-Health Centre

Sub-Health Centre is attached to RHC. This is an old concept as existing sub-health centers are gradually being converted into BHUs.

U**Under-5 Mortality Rate**

The deaths of infants and children under the age of five in the reference year. The value is expressed per 1000.

Under Weight Prevalence

Under Weight Prevalence is the percentage of under-five who fell below minus 2 standard deviation from median weight for an age of NCHs / WHO reference population.

Unemployment rate

It is the ratio of unemployed persons to the labor force.

W**Wholesale Price Index (WPI)**

WPI represents the price of goods at a wholesale stage i.e. goods that are sold in bulk and traded between organizations instead of consumers. It is used as a measure of inflation.
